

Sunset Golds

Cypress Mulch - Naturally termite resistant mulch with long lasting colour. Very stable making it suitable for windy areas. Smells fantastic. Definitely a landscapers favourite.

Coura Gold - Ever popular smooth golden gravel. Use as a mulch or a feature in between creamy yellow coloured pavers. Compliments sandstone retaining walls. Standard size 20mm. Other sizes subject to availability.

Decomposed Granite - Blending pathways and driveways into the landscape in an inviting soft ochre colour. This is a compactible product to give a firm surface, and can be stabilised with cement on request.

Crushed Tile - This is a recycled 7-18mm terracotta that has been tumbled to soften the edges. An economic ground covering in low traffic areas.

Random Sandstone Flagging - Assorted sizes around 300mm x 50mm thick. Creamy sandstone slabs that can be layed out as pathways. Also stacked or mortared for retaining walls and facework.

Random Sandstone Blocks - Square and rectangular blocks that can be utilised in drystone retaining walls or as features in the garden.
