

Is our mulch safe?

YES

By now, you are most likely aware of the asbestos contamination in multiple locations across Sydney.

How we ensure that our mulches are safe:

- We source from reputable suppliers.
- We do not source from Greenlife Resources Recovery.
- Our mulch complies with all current orders and exemptions from the EPA.
- The majority of our mulch products are derived from natural/virgin sources, and this inherently represents the lowest level risk of any contamination.
- None of our mulches are sourced from recycling construction waste. They are sourced from either natural plantation timber or milled waste wood from timber mills.
- Whilst there is no requirement to test or certify most products, our suppliers often conduct independent tests. We are actively working with our suppliers to obtain further test results and data sheets to keep on file.
